What we do

Over a decade of experience in manufacturing and global distribution of precise-engineered springs

Founded in 2013, Ayyappa Springs has always been committed to quality and customer satisfaction. Today, Ayyappa Springs is a reputed manufacturer and distributor of a technically advanced array of springs ranging from form springs and tension springs to spring clamps and sheet metal spiral springs.

Every spring we manufacture adhere to the highest quality standards, utilize top-grade materials, and are individually tested so that customers receive products of impeccable quality.

This dedication to quality continues to spur our growth and motivates us to take on more challenging customization requests from clients all over the world.

Stock Springs

With over 500 stock spring designs, Ayyappa Springs brings you the widest range of springs suitable for an array of products ranging from pens and toys to industrial equipment and automobiles. We cater to an international customer base and assure immediate and impeccable delivery. Search through our extensive database to locate the right springs for your needs.

Custom Springs

We are unmatched when it comes to manufacturing high-grade, precision-engineered springs as per customer specifications. With over a decade of experience in customizing springs across different materials, designs, and finishing selections, we are empowered with the skills to manufacture springs in any size, thickness, and dimension.

Manufacturing

At Ayyappa Springs, we are equipped with advanced technologies and machinery to manufacture springs that meet the exact specifications of customers. We have the resources to deliver orders of any size to all major locations around the world. Every product from Ayyappa Springs adheres to strict manufacturing regulations and meets international quality standards.

Our Founder

Mr. Jayan S.K.

Mr. Jayan S.K. feels extremely blessed to have ventured into this field since he discovered that this industry is his true passion. He preserves to explore more in the realm of springs, gain valuable knowledge about emerging industry trends and utilize this updated information to create better and more durable versions of springs, thereby benefiting customers across a range of industries.

Under the capable leadership of Mr. Jayan, proprietor of Ayyappa Springs, the firm continues to surge ahead with high-grade products and precise-engineered spring versions. He strives to keep ahead of international trends in the industry and incorporates the latest technologies to create products that surpass expectations.

Today, Ayyappa Springs is one of the most trusted names in the industry, capable of manufacturing springs in any specification. With an unwavering commitment to customer satisfaction, quality, and on-time delivery, Mr. Jayan envisions expanding Ayyappa Springs to global heights and creating a niche in the international industrial springs market.
